BUY SMART. LOOK SMART.

At Gildan®, we're all about helping you make the smart move by providing dependable, quality printwear at the best prices. The kind of product that raises eyebrows and IQ's.

How do we achieve this?

Our vertically integrated manufacturing model allows us to oversee nearly every aspect of production, from supporting American farmers by purchasing U.S. cotton to loading your order onto the delivery truck. This ensures the greatest possible consistency, so you can count on a small Gildan® 5000 to fit consistently.

Our mission to make you look smart doesn't stop there. We're constantly innovating to enhance our products, with our new Soft Cotton technology that makes for softer and durable styles.

And if choice is what you need, we've got you covered. From 100% U.S. cotton to 100% polyester, performance wear to polos, and semi fitted to classic fits, we have the ideal option for any decorating technique.

From garments that look stylish on you or on paper, Gildan has you covered.

Gildan®. Just Smart.

Special Tips

DTG: The amount of pre-treat used on fabric blends might differ to the amount used on 100% cotton.

SUBLIMATION: Best results on 100% polyester, use it preferably on white or light colours. Use 50% polyester blends or higher for vintage and faded prints. Always check temperature settings to avoid melting of polyester.

HEAT TRANSFER / DTF

Heat transfer involves combining heat and pressure to transfer images to garments. This is a great option for detailed prints, customization, shorter runs and quick turnaround times.

DIRECT TO GARMENT

Direct to garment printing (DTG) is printing on textiles using inkjet technology which usually utilizes specialized water-based inks. DTG is particularly effective for short runs, full color printing, or for reproducing fine detail.

EMBROIDERY

Embroidery is sewing a design, type or logo onto a garment with special thread. This technique gives garments a higher perceived value and works particularly well on heavier weight garments such as fleece.

SCREEN PRINT

Screen printing (or silk screening) is a technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.
