TR503

OUR COMMITMENTS

At TriDri®, we prioritise top-notch performance while staying mindful of our planet.

We're excited to announce that we're incorporating alternative materials to reduce our environmental impact. Picture yourself in functional and stylish sportswear made from recycled polyester and nylon - materials that would have ended up as waste! But we're not stopping there. We're also sourcing organic cotton, which reduces the impact to the environment by using less water and no harmful chemicals. This is our commitment to you and the future, not just a fashion statement. Let's embark on a more responsible journey together.

TR504

DÉCOR

At TriDri®, our journey with you doesn't stop at just providing top-notch sportswear.

We make sure our clothes are your canvas, primed and ready for you to add your personal touch. Showcase your squad's spirit, print your mantra, or flaunt your class logo - our garments provide the ideal print surface. Make it your own, TriDri® gear is waiting for your finishing touch!

TEXTURED TEES

Cationic is a term used to describe dye that is positively charged on to a fabric that is negatively charged. The result is a colourfast, permanent colour. Cationic clothing is resistant to fading, bleeding, and staining meaning they hold their colour within different environmental factors and multiple cleaning methods. Making them perfect for sports and workwear.

SPUN DYED

The material of this product is manufactured using the 'spun dye' dyeing process. Compared to standard dyeing practices spun dye uses:

- 75% FEWER CHEMICALS
- 66% LESS WATER
- 60% LESS CO₂

The spun dye process dyes garments prior to the spinning process which also means garments offer improved colour fastness.

For a more responsible choice that works as hard as you do choose spun dye.

UNISEX STYLE

TR448 TRIDRI® SPUN DYED HOODIE

The TriDri® spun dyed hoodie is a unisex style you can wear in or out of the gym. It's made from smooth recycled polyester with sweat-wicking technology and a fit that's relaxed. This product is also created using spun dye technology that uses less chemicals, water and CO₂ during production as well as improving the garments overall colour fastness.
